HERE AND THERE

Canadian Junior (January 5-8)

This year's Canadian Junior Championship is currently underway in Calgary with three representatives from B.C., John Doknjas, Jason Cao, and Jill Ding (Loren Laceste was preregistered for the event but for whatever reason is not playing). After three rounds Jason has 2.0 points and John 1.0, while in the Girls' Section Jill Ding has a perfect 3.0/3 but has to face top-rated Regina-Veronicka Kalaydina in round four. Standings and games (although only the first three boards are broadcast live, all games are made available soon thereafter) can be found at the [Tournament website](#).

Leon Piasetski is participating in this norm event in Fremont, California. After six rounds he has 50% in the sixty-one player field, which includes fellow Canadians Michael Kleinman and Dale Haessel. [Tournament website](#)

January Active (January 2)

Organizer Luc Poitras and Dale Haukenfrers beat the two highest seeds, Vicente Lee Jr. and Butch Villavieja respectively, in tying for first in the first active event of the New Year (these active players don't waste any time in getting started again after the holidays - in fact this was the third active tournament in less than a month). Sylvain Gaudreau and Jeremy Hui tied for the U1900 prize, Omar Jessa won the U1600, and Luc Poitras and Jack Qian shared upset prizes. Twenty-four players took part. [Crosstable](#)

North American Open (December 26-29)

Tanraj Sohal and Constantin Rotariu both had very happy holidays: they won their respective sections (U2300 and U1700) of the North American Open in Las Vegas, thus gaining several thousand (U.S.) dollars each in the process - congratulations! Also winning money were Jason Cao (U2100) and Eugenio Alonso Campos (U1900), while the prize lists also included several of our Washington friends, such as Hanneign Pitre and Ethan and Naomi Bashkansky. Other participants with a B.C. connection included Sean McLaren, Jofrel Landingin, Juni Caluza, and Alexandra Botez. KOBANYA OPEN (December 16-18, 2011) by Michael Yip

About fifty players contested the latest Kobanya Sport Club Open. Two players shared first with 5.5/6 while I took 3-4th equal but took fourth on tiebreak as the #9 seed. The entry was 13 CAN\$/9.8EUR/12.8USD, a normal Hungarian bargain. The three games on Saturday showed me in bad form as I continually missed simple tactics and had great difficulty finding a plan against the #2 seed. Sunday went better as I won both games but all in all my play was quite ordinary. As usual I had a great time and found some new friends to analyze and chat with.

1.e4 e6 2.d4 d5 3.e5 c5 4.c3 Nc6 5.Nf3 Bd7 6.a3 f6 7.Bd3 fxe5 Is an easy move to make but there is a more subtle way to play. 7...Qc7!?! is the plan recommended by Simon Williams in *The French* (Everyman 2011). Black keeps the tension in the centre and just increases the pressure on e5. 8.0-0 0-0 9.Bf4 c4 10.Bc2 h6! Preparing to expand on the kingside. 11.h4 Be8!?! A typical regrouping. 13...Bg7?! Starting to lose the thread of the game. It's better to play ..Rg8 first then ...Bg7. promising. 20...h5 21.b6 a6+/- **20...hxcg6=** During the game I thought that White was slightly better as Bg7 is passive and Na5 is out of play. **21.Qh3 Re8=** Black is content to defend and hold. White's only real attempt at line opening is the f4 advance but this will in turn open up lines in front of White's king. **22.Re3?!** The start of an over ambitious but unproductive plan that only misplaces the rook. **22...Rhf8 22...Bf8!?** is interesting plan. Black will regroup the bishop on c5 where it will be much more active. 23.a4 Qf7 24.Rf1 Bc5 25.Ree1 Rhf8=/+ Black is starting to take over. 26.Qxh6? Allows Black to infiltrate with the queen and gain the upper hand. 26...Qf5 27.Re3 Bxd4 28.cxd4 Qc2 29.Nf3 c3=/+ The c-pawn dominates the position while Qh6 is just a spectator. **23.Rg3?** Too aggressive. There is a flaw that Black spots right away and now White's game quickly deteriorates. The problem is that White invests precious time on Rf1-f3-g3 only to misplace the rook. This gives Black time to complete development and get in the completely logical ...g5 undermining move when White cannot effectively support the f-pawn with g3. 23.Rf1 Reinforcing f4 is better and White is equal.

23...g5! Now Black successfully undermines the central pawn chain and White's position crumbles. **24.Rf1?—+** Total collapse but White has a choice of only bad moves to choose from. 24.Re1 is relatively best. 24...Rxf4 25.Qh5 (25.Rge3-/+) 25...Bf8!-/+ The key idea is to reroute the bishop to c5. 26.h3-/+ The alternatives are much worse. BROWSING FOR ENDGAMES by Dan Scoones

Last time we looked at an endgame of rook + bishop vs rook + knight where the owner of the knight was a pawn down and struggling to make a draw. Today we will look at a classic position featuring the same distribution of material. However, in this case the defender's situation is even more hopeless and in fact the only chance of escape is an out-an-out swindle.

The diagrammed position arose in the famous game **Marshall – Marco, Monte Carlo 1904**, and first came to my notice in the book *Chess Traps, Pitfalls and Swindles* by I.A. Horowitz and Fred

Reinfeld. Black's last move was 40...a5, which forces either an exchange of rooks or the creation of a dangerous passed pawn.

Situation desperate

Trading rooks is clearly out of the question. White's only hope is a counterattack with his rook.

41.Rh4 axb4 42.Rxh7+ Kd8 43.Nf4 b3 44.Nxe6+ Kc8

Swindle time

In his classic book *My Fifty Years of Chess*, Frank Marshall wrote the following note: "White's position has become desperate, as the hostile KtP must queen. I therefore try a last swindle..."

45.c6!?

Not 45.Rxc7+?! Kb8 and White is out of ammunition. The text invites Black to defend his c-pawn – a natural idea but a bad mistake!

45...Be5?

After 45...bxc6 46.Rxc7+ Kb8 47.Rxc6 b2 48.Rb6+ Kc8 49.Rb3 Black can insure the promotion of his pawn with 49...Rb4! 50.Rxc3+ Kb8 51.Nc5 Rb5 52.Nd7+ Kb7 53.Nc5+ Ka7 54.Ra3+ Kb8 55.Na6+ Kb7 56.Nc5+ Kc7 57.Ne6+ Kb8 58.Nd4 Rb6. This is admittedly a long variation but it is actually not hard to calculate. The rationale is simple: escape the checks and avoid knight forks!

46.cxb7+ Kb8 47.Nc5 Ra2+ 48.Kh3

Also possible was 48.Kf3, but it doesn't change the assessment of the position.

48...b2 49.Re7! Ka7 If Black promotes his pawn, then he loses his new queen to a skewer, as the reader can verify.

50.Re8! c6 The only defence to White's threats. Marco probably thought he was doing well here, but that's not the case – as Marshall cleverly demonstrates.

51.Ra8+ Kb6 52.Rxa2 b1Q 53.b8Q+! Bxb8 54.Rb2+! The final link in White's combination.

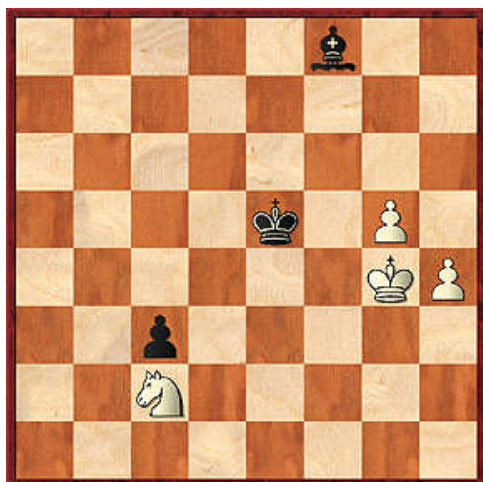

54...Qxb2 55.Na4+ Kb5 56.Nxb2

Boot on other foot

“This is swindling in the grand manner!” wrote Horowitz and Reinfeld. Marco must have been pretty shell-shocked by now because he didn't put up much resistance, even though he could still have drawn rather easily.

56...c5 57.Kg2 c4 58.Kf3 c3 59.Nd3 Kc4 60.Ne1 Kd4 61.h4 Bd6 62.g4 Be7 63.g5 Ke5 64.Kg4 Bf8 65.Nc2

The final error

65...Ke4?

The wrong idea, and the losing error. Black can save the draw by bringing his king in front of the pawns: 65...Ke6! 66.h5 Kf7 67.Kf5 Kg7. This line was demonstrated by Marco himself – probably in the *Deutsche Schachzeitung*, which he edited between 1898 and 1916.

66.h5 Kd3

He's missed something

67.Na1!!

Beautiful. Now if 67...Kd2, then White wins after 68.h6 Kc1 69.Nb3+ Kc2 70.h7 Bg7 71.Nc5! (From here the knight is ready to go to b3 or d3 according to circumstances, and he cannot be driven off by the bishop because then White's h-pawn will promote. The best Black can achieve is a hopeless ending of bishop vs queen.) 71...Kc1 72.g6 c2 73.Kf5 Bc3 74.Ke6 Bd4 75.Kf7 Bxc5 76.h8Q 77.Kb1 Qh1+ 78.c1Q 79.Qxc1+ Kxc1 80.g7 and wins.

Instead Black tries to send his king back the other way, but it is too late.

67...Ke4 68.h6 Ke5 69.Kh5 Kf5 70.Nc2 Bd6 71.Nd4+ Ke4 72.Ne2 c2 73.g6 Ba3 74.g7 Kd3 75.g8Q Kxe2 76.Qa2 1-0

2011 IN B.C. CHESS
