

BCCF E-MAIL BULLETIN #317

Your editor welcomes any and all submissions - news of upcoming events, tournament reports, and anything else that might be of interest to B.C. players. Thanks to all who contributed to this issue. To subscribe, send me an e-mail (swright2@telus.net); if you no longer wish to receive this Bulletin, just let me know.

Stephen Wright

HERE AND THERE

Karpos Open (April 1-7)

IM Leon Piasetski is on the road in Europe again, where his first event was the just-completed [Karpos Open](#) in Skopje, a city with a rich chess heritage. The nine-round Swiss attracted two hundred and five entrants, including twenty-seven grandmasters. The overall winner was the veteran Bulgarian six-time champion Kiril Georgiev with 7.5/9, a half-point ahead of eight players tied for second. Leon finished with 5.0 points after recovering from a nasty surprise in round four:

Milanovic, Danilo - Piasetski, Leon [E46] Karpos Open 2016 Skopje, MKD (4.14), 03.04.2016

1.d4 Nf6 2.c4 e6 3.Nc3 Bb4 4.e3 0-0 5.Nge2 Re8 6.a3 Bf8 7.Ng3 d6 8.Bd3 e5 9.0-0 exd4 10.exd4 c5 11.d5 Ng4 12.Be2 Qh4 13.h3 Nxf2 14.Kxf2

In my morning game I had a chess hallucination – first time ever. I gave up a piece for a pawn to draw his king out and attack it but thought my g7 pawn was my bishop on f8 ... I saw all kinds of nice tactics based on this misconception but was rudely awakened when I reached out to give a check with my pawn from g7-d4 :-). Jet lag, double rounds, a morning round and only 5 hours sleep is a perfect storm!

g5 15.Qd3 Nd7 16.Kg1 Ne5 17.Qe3 h6 18.Nge4 1-0

B.C. SPFGI Qualifier (April 3)

The Susan Polgar Foundation Girls' Invitational, now in its thirteenth year, is the most prestigious all-girl event in the United States. Last year the competition was expanded to include players from other countries in the Americas, including Canada; this year a further expansion allows Canadian provinces to nominate an official representative to the tournament. The B.C. representative was determined through a qualification event held under the auspices of the Golden Knights Chess Club (Valer Eugen Demian) at the Charles Rummel Centre in Burnaby. The five-round Swiss active tournament was won by Sherry Tian with 4.5 points, second was Agata Seyfi; twelve players participated. [Standings](#)

Another FIDE title

It doesn't rain but it pours; after announcing several FIDE titles for B.C. players in recent issues, there is another one to add to the list: Henry Chiu is now a [FIDE Arbiter](#). Congratulations!

Park Royal Chess Players

Chess has made it into mainstream news sources of late, but unfortunately not in the best of circumstances. The management at the Park Royal Shopping Centre in West Vancouver have decided, on the basis of a cost-analysis, to evict the group of chess players who were meeting casually in the centre's food court, this despite there being a long history of both formal and informal chess playing at Park Royal (see article later in this issue). The story was covered by the [Vancouver Sun](#), [CBC](#), and other local outlets; public reaction to the decision seems to have been almost universally negative. The chess players have subsequently [received offers](#) of a place to play from two other Park Royal tenants, Whole Food Market and White Spot, so it appears that chess may yet continue at the mall.

Pawn Endings

Nick Beqo has created an album of positions on [Facebook](#) for those wishing to test their skills in this area

GRAND PACIFIC OPEN by Roger Patterson

The 10th Annual Grand Pacific Open drew a blowout record one hundred and fifty-two players from around the world: Brazil, France, six states and seven provinces. Turnout for all tournaments organized by Victoria Chess this last year was at record numbers and it became clear to us back in February that this year's GPO was going to continue the trend but even so, we underestimated the final turnout. A fitting turnout for our 10th anniversary (and check out the fabulous birthday cake the hotel gave us for our awards ceremony!).

The player list was headed by pre-tournament favorite GM Alexandr Fier, IM Bindi Cheng, and a number of FMs, NMs, a WGM, and the usual suspects from the local BC chess playing scene. Players of a certain age will remember the Ross brothers, IM Dave and FM Paul, who apparently were using the GPO as a warmup event prior to their participation in this year's World Senior Team Championship.

Although the clear favorite rating wise by a wide margin, GM Fier had his scored nibbled away by NM Robert Sasata with a round 3 draw and a round 5 draw with BC Champion Jason Cao. He played sharply against Jason and it looks like he missed a win in the middle game. In the end, Fier tied for first with Cao and FM Kevin Gentes with Cao taking the trophy on tiebreak. Congratulations to Jason Cao!

Our Winners: Left to Right - Paul Leblanc (organizer), FM Kevin Gentes, FM Jason Cao, GM Alexandr Fier (TD Mark S. Dutton can be seen in the back)

There were a number of side events starting with a set of simuls against WGM Nino Maisuradze and GM Alexandr Fier. As is the usual case in such events, the featured players scored heavily winning all but one of the games against the roughly twenty-six players with only Andrew

Hemstapat holding a draw against Fier. Next up was the VYCC (Victoria Youth Chess Championship), a qualifying event for juniors to the national Youth Chess Championship. The ever popular Midnight Blitz drew what I think is also a record forty-three players and was won by Becca Lampman with a perfect 8.0/8 score. And as every year, the tournament closed out with a Bughouse tournament.

Finally, a big thank you to our [sponsors](#), both corporate and individual donors, all of those who volunteered in some way, our head TD Mark S. Dutton, IA, side event TD Elliot Raymer, and supervisors for the lower boards Charles Huang and Robin Luo.

Organizers: Brian Raymer, Paul Leblanc, Roger Patterson

Head TD: Mark S. Dutton, I.A.

This [report](#) plus complete standings, lists of prize winners, links to a PGN file and photos.

BRUCE HARPER ANNOTATES

Opponent - Harper, Bruce [A01] ICC 3 0 Internet Chess Club

In this game, Black comes up with an idea. It was a good idea, but it really wasn't sound and shouldn't have worked. But it did. Does chess get any better than that? **1.b3** [0:03:00] **1...e5** [0:03:00] I don't always play 1...g6 on the first move. **2.Bb2** [0:02:58] **2...d6** [0:02:59] **3.e3** [0:02:57] **3...Nd7** [0:02:58] **4.Nf3** [0:02:56] **4...g6** [0:02:58] **5.d4** [0:02:53] **5...Bg7** [0:02:56]

Played pretty quickly by Black, whose idea is simply to maintain a strong point on e5, to block the a1–h8 diagonal occupied by White's b2–bishop. Larsen-Nimzovich (1.b3) players always want to win on that diagonal. This knowledge played an important part in Black's thinking in this game. **6.h4!?** [0:02:50] It's hard to know what to say about this move, which comes out of nowhere. I think I admire it. **6...e4!** [0:02:54] **7.Nfd2** [0:02:48] **7...f5** [0:02:53] **8.h5** [0:02:48] **8...Ngf6** [0:02:52] Black's idea is to invite either 9.hxg6 hxg6 10.Rxh8+ Bxh8 (when White has opened lines on Black's side of the board) or 9.h6 (when White has blocked his own attack, and left himself with a potentially weak h6–pawn). It follows that White's best move is now 9.Be2, keeping his options open. **9.d5?** [0:02:42]

9...0-0? [0:02:47] The all-seeing engine doesn't hesitate for a moment - 9...Nxb5! 10.Bxg7 (10.Rxh5? fails completely after 10...Bxb2) Nxg7 wins a safe pawn and leaves Black with a safe advantage. After 9...0-0?, though, White's idea of opening the h-file starts to work and Black has to play carefully not to get in trouble. **10.hxg6** [0:02:37] **10...hxg6** [0:02:46] **11.c4** [0:02:36] **11...Qe7** [0:02:42]

12.Be2? [0:02:31] **12...a6?** [0:02:41] An echo of the double blunder on move 9. 12...Nxd5! snatches an important pawn, because White's b2-bishop is hanging and after 13.Bxg7? Qxg7, his a1-rook is attacked. 11...Qe7 therefore laid a subtle trap, but since Black was expecting the obvious 12.Nc3, he answered 12...a6? more or less instantly (to prevent Nc3-b5). The perils of moving quickly! **13.Nc3** [0:02:27] **13...Ne5** [0:02:39] **14.Qc2** [0:02:26] **14...Bd7** [0:02:37] **15.0-0-0** [0:02:24]

The game has now settled down a bit, with neither player having done anything stupid for several moves. Black now launches his attack on the queenside, as planned. Objectively the position is still balanced. **15...b5!** [0:02:36] **16.f3** [0:02:21] The natural reaction. Otherwise only Black will have play. **16...bxc4** [0:02:32] **17.bxc4** [0:02:19]

17...exf3?! [0:02:30] An important moment worth noting. 17...Rab8 was correct, as 18.fxe4? could be met strongly by 18...Nfg4!, threatening both 18...Nf2 and 18...Nxe3. 17...exf3? just opens lines for White's pieces. **18.gxf3 [0:02:19]** **18...Rab8 [0:02:29]** **19.Rdg1 [0:02:13]** **19...Be8 [0:02:19]** Black does not hit upon the very logical 19...c6!, opening more lines to White's king. This would have taken the sting out of White's impending transfer of his d2-knight to d4. **20.Nb3! [0:02:08]** **20...Ned7? [0:02:11]** Now White's advantage is real. **21.Qd2 [0:02:02]** **21...Nc5 [0:02:04]** **22.Nd4 [0:01:52]**

22.Nxc5 was also good. **22...Rxb2!? [0:02:02]**

And here is the "idea" mentioned in the introduction to the game. Black sacrifices an entire exchange, seeking to prove simply that White's b2-bishop is worth a rook. It would be, if the a1-h8 was fully open. If you look only at Black's pieces, the sacrifice seems justified, but if you add White's pieces into the mix, things are not so rosy. So the sacrifice can be termed "optimistic", "far-sighted", or maybe just "bad". But this is also a 3-minute game, and White's position now becomes more difficult to play, because he has to keep control of the position (specifically, he has to avoid excessive dark-square weaknesses, which is easier said than done with the clock ticking). The engine has no trouble assessing the position as winning for White at this point, by the way.

23.Kxb2 [0:01:50] **23...f4!? [0:01:59]** The logical continuation, but Black is naive in thinking it will be so easy to conquer the dark squares. **24.e4?! [0:01:46]** White should just capture with 24.exf4! **24...Nfd7 [0:01:57]** **25.Rg4 [0:01:40]** **25.Kc2!** **25...Ne5 [0:01:53]** **26.Rg2?! [0:01:35]** **26.Rgh4!** was more consistent, followed by 27.Rh7. **26...Qf6 [0:01:48]** **27.Rd1 [0:01:31]** **27...Bf7 [0:01:37]** The immediate 27...Ned3+ was possible, but Black either wanted to build up the pressure, by clearing the back rank for his rook, or didn't see it. I actually think it was the former, but I wouldn't rule out the latter. **28.a3 [0:01:28]**

28...Ned3+! [0:01:31] **29.Bxd3** [0:01:24] **29...Qxd4** [0:01:30] Now all of Black's positional ideas are bearing fruit and threats are starting to appear. The first one is 30...Na4+. **30.Kc2** [0:01:19] **30...Rb8** [0:01:17] **31.Bf1** [0:01:17] **31...Qe5** [0:01:10]

32...Rb3! [0:01:03] **33.Nd1** [0:00:28] **33...Be8!** [0:00:53] Of course Black refuses to trade queens. On e5, Black's queen keeps up the pressure down the now-legendary a1–h8 diagonal and, as an added bonus, defends his f4–pawn. In a 3–minute game, it also doesn't hurt that Black's e5–queen is on the ideal square with respect to White's c3–knight, which can't attack it for three moves (IM Gordon Taylor aptly used the Go term "tesuji" to describe this sort of relationship). **32.Rc1?** [0:00:47] White took 30 seconds for this move, but - for better or for worse - 32.Rb1 had to be played.

An absolutely killer move, preparing to bring Black's last piece into the attack. Things have gone horribly, horribly wrong for White. So naturally this position deserves a diagram. **34.Qa5** [0:00:15] **34...Rxf3** [0:00:41] Destroying the base of White's pawn chain. Checkmate is incidental. **35.Be2** [0:00:08] **35...Qxe4+** [0:00:38]

White's position is really bad. **36.Kd2** [0:00:04]
36...Nb3+ [0:00:29] White resigns. **0-1**

CHESS AT PARK ROYAL

The Park Royal Shopping Centre was opened in 1950 and is regarded as Canada's first covered shopping mall. According to the news reports mentioned earlier chess has been played at the mall for fifty years; presumably this activity was casual and informal and thus undocumented. However, Park Royal was also involved in formal chess events in at least two areas:

The Chess Square

Jonathan Berry vs. Elena Donaldson, 1992; just visible is a chess clock on the table

On 30 June 1984 a Chess Square was officially inaugurated at Park Royal. Consisting of tiles inlaid in the floor, the board measured 2.5 metres on each side, while the pieces were carved from maple wood; the kings were 60 centimetres tall and weighed 6 kilograms. The set was available to members of the public six days a week and was a popular feature at the mall. To celebrate the first anniversary of the Square the B.C. and Washington champions, Nigel Fullbrook and Jeremy Silman, played a match on 30 June 1985, co-sponsored by the BCCF and Park Royal. These matches continued on an annual basis until 1993, although it should be noted that there were occasional substitutions, the respective champions not always being able to attend. Silman, now a

famous chess author (*How to Reassess Your Chess, Silman's Complete Endgame Course*) won the first match against Fullbrook, but then B.C. roared back with four straight wins. Washington won the next three before Jonathan Berry ended the series by defeating Corey Russell. The matches consisted of two games at a time control of 90 minutes per player; the latter added to the physical nature of the competitions simply because the clock stood several feet away from the board. One memorable instance was one of the Basanta-Pupols games, where Gary managed to make twenty moves in a minute to overcome a time deficit and actually win on time.

	Date	B.C. Representative	Score	WA Representative
1985	June 30	Nigel Fullbrook	0.5-1.5	Jeremy Silman
1986	December 6	David Ross	1.5-0.5	Matt Edwards
1987	June 13	David Ross	1.5-0.5	Bobby Ferguson
1988	June 4	Tom O'Donnell	1.5-0.5	Matt Edwards
1989	July 8	Gary Basanta	1.5-0.5	Viktors Pupols
1990	October 27	Brian McLaren	0.5-1.5	Neil Salmon
1991	July 7	Nicholas Spears	0.0-2.0	Neil Salmon
1992	July 11	Jonathan Berry	0.0-2.0	Elena Donaldson
1993	July 10	Jonathan Berry	1.5-0.5	Corey Russell

The Chess Square was a feature at Park Royal until 2006; in that year the floor tiling was replaced at the mall, but the chess board was not retained. All of the games from the champions' matches can be found in the attached PGN file.

B.C. Junior Championships

In 1987 West Vancouver celebrated its 75th Anniversary; as part of the festivities an open chess tournament was held at the West Vancouver Seniors' Activity Centre, won after a playoff by Leon Piasetski over John Donaldson. Adjunct to this was a three-section junior event at the Park Royal Chess Square site which attracted sixty-three entrants, followed by a twenty-four board simultaneous display by Duncan Suttles. The junior festival at Park Royal became an annual event for the next seven years, 1988-1994; these festivals included the B.C. Junior (U19) and Cadet (U15) Championships, along with other sections for younger players (in various years, U8 and U10, U9 and U11, or sections by grade). In other words, the equivalent of what we now call the BCYCC, except the first CYCC did not take place until 1999. These junior events were jointly sponsored by Park Royal and the BCCF, with total prizes in any given year in the \$1,400 range. It appears these chess collaborations received much support from Per Danielsen, the Park Royal Marketing Manager at the time (pictured at right with five-year-old Andrew Ho).
