Continuing on his travels, Leon Piasetski played in the [22nd Cutro Open](#) (April 24-30); Cutro is a town in the Calabria region of Italy, on the 'sole' of the Italian 'boot.' The tournament itself seems to have escaped the attention of most sources (e.g., The Week In Chess) and the only information we have is the FIDE rating report, never the easiest item with which to deal. However, it appears the event was won by Mirosljub Lazic (Serbia) and Nikolai Ninov (Bulgaria) on 6.5/9, a half-point ahead of Bogdan Lalic (Croatia) and Vladimir Lazarev (France) – grandmasters all. Leon finished on plus one with 5.0 points, including a draw with another player familiar to us in BC, Nino Maisuradze. Then it was off to the Balearic Island of Mallorca for the [5th Lluçmajor Open](#) (May 8-15). This tournament was a triumph for the veteran Peruvian GM Julio Granda Zuniga, who crushed the one hundred and eighty player field (including twenty-two grandmasters) with the score of 8.5/9, a full point and a half ahead of the second-place finishers. Here Leon scored plus two (5.5 points).

41st PAUL KERES MEMORIAL (May 21-23)

This year the annual Keres Memorial almost didn't happen. Last year the BCCF instituted a bidding process for official tournaments, but after deadlines had passed there were three events which received no bids – the BC Active Championship, the BCYCC, and the Keres. BCCF President Alonso Campos graciously undertook to organize all three tournaments at the Guru Angad Dev Elementary School in Surrey, the host for the BC Closed and Vancouver Open last Thanksgiving. Unfortunately players have either not warmed to the location or the tournament experience offered to them, because numbers for the Active and BCYCC were down considerably from last year's events.

This trend continued with the Keres, which only attracted sixty-three players this year. Despite the smaller numbers and organizational issues which substantially delayed the first round the tournament remained competitive, with five masters and twelve players rated over 2000. 2013 BC Champion Tanraj Sohal has won many events in the past few years, including four BC Opens, but the Keres had eluded him – until now. Oliver Schulte and Kevin Gentes both gave up several draws and lost key games, to Harry Moore and Howard Wu respectively, which enabled Sohal to take the first prize with four wins and two draws (Alfred Pechisker and Schulte). He also qualifies for this year's BC Closed Championship. Pechisker was also undefeated, but an additional draw left him in clear second, while somewhat surprisingly there was also a clear third – Brian McLaren, who was helped by two (strategic?) byes.

Juniors did not have much of an impact on the standings in the Open Section, but the U1900 Section featured many intergenerational battles. In general the juniors came out on top; Brandon Zhu, ranked twelfth at the beginning, placed first with 5.0/6, Victor Zheng scored 4.5 and Michael Su and Daniel Chen were a further half-point back. Upholding the honour of the older generation was Duncan Haines, the only player to defeat winner Zhu, who tied for second with Zheng. Also having a good event was Mau-Seng Lee, significantly at the expense of other adults. In the U1600 Matthew Ehrenreich was first, also with five points, while Ryan Leong, Ryan Branch, and Clement Cheng tied for second. (We do not have access to a complete list of prizewinners, therefore are not aware if there were any class prizes.) The organizer and director was Alonso Campos. [Standings](#) It should be noted that plans are already under way to place the Keres on a better footing for next year.

NATIONAL CHESS CHALLENGE by Gyan Awatramani

For the first time in its twenty-eight year history, the annual Canadian Chess Challenge was held in Regina, Saskatchewan, on May 22-23, 2016. Played at the Dr William Riddell Centre at the University of Regina, each province had a team of twelve players, one from each grade (1-12).

After much drama, heartbreak, tears and euphoria, Team BC under the stewardship of team captain Maxim Doroshenko amassed a grand total of 83.5 points. Nine of our players scored 7 points or more out of a possible 9! This is our best performance ever in terms of number of points scored, however it was not enough to surpass Ontario and Quebec. While the overall (83.5) score was reflective of a great all-round performance, team BC needed at least 6 or 6.5/12 in the matches against Quebec and Ontario. That key component was our weakness, and an area where we have lacked the depth, and experience over the years. Also interesting to note was the 25 point difference between third (BC) and fourth (AB)!

Player scores grade 1-12:

Ryan Yang - 7.5
Daniel Wang - 7
Andrew Xu - 4.5
Lucian Wu - 7

Neil Doknjas - 7
Leo Qu - 6
Ethan Low - 6.5
Joshua Doknjas - 7

Matthew Geng - 7.5
Jason Cao - 7.5
Janak Awatramani - 8
Jeremy Hui - 8

Team BC won a total of eleven individual trophies! Many congratulations to ALL players on Team BC for an excellent performance. Every point, every half point added value to the overall team score of 83.5. This, by far, is more important than individual performances at the Canadian Chess Challenge.

Some other highlights:

Jeremy Hui, in his last year (Grade 12), our flag bearer and junior captain, inspired players with his words of encouragement between rounds, and went on to win Gold (National Champion) and the bughouse championship.

Janak Awatramani won the "triple crown [sic]", Gold (National Champion) after a two-hour playoff, the open blitz championship, and the bughouse championship.

Ryan Yang and Joshua Doknjas both finished with Silver.

The junior bughouse championship was won by Leo Qu and Lucian Wu.

Our team dinner at Earl's restaurant was well attended, and we had the pleasure and honour to have Larry Bevand celebrate with us. Larry Bevand is the executive director for the Chess and

Math Association, Canada's National Scholastic Chess Organization. In keeping with tradition Jeremy was treated to a farewell desert, and Larry joined us for an operatic sing song bidding Jeremy goodbye, since this would be his last year representing BC at the Chess Challenge.

Many thanks to team captain Maxim Doroshenko, the tireless efforts of Vivien Lai, our respected coaches, our sponsors, and to all supportive parents. The future looks promising. I'm confident that our BC junior stars will rise to the occasion, and settle scores with our enduring rival provinces in the coming years. Goodluck in Toronto 2017, and congratulations once again!

25th BC - WA SCHOLASTIC MATCH (INTERMAT) (May 14)

(photo by Dave Doknjas)

This year's INTERMAT was held in Vancouver, in a spacious room in the Pharmaceutical Sciences Building at the University of British Columbia – many thanks to Laurent Chaurette and the UBC Chess Club for providing the site. The INTERMAT is a cross-border battle, annual since 1991, between school-aged children representing BC and Washington. The teams are comprised of two players each from grades 1-12 plus kindergarten, who play one game each with their corresponding numbers on the other team. Traditionally BC has scored heavily in the upper grades, Washington in the lower, but this generalization has been breaking down in recent years; a more important factor is the respective teams' difficulty in recruiting their best lineup when playing away from home (the match alternates between BC and Washington).

BC slowly built up a commanding lead in the first round (playing white on all boards) to the tune of 17.0-9.0, which meant they only needed to score 9.5 points in the second round (playing black) to win the match. In the end they scored 15.5, thus achieving victory by 32.5-19.5. This year BC's lowest grades (K-4), aided by strong performances in Kindergarten and grade 2, suffered only a minimal defeat by one game in the twenty games they played, 9.5-10.5. In grades 5-8 BC outscored their rivals 11.0-5.0, and continued this in grades 9-12 where the margin was 12.0-4.0. BC won seven of the mini-matches by grade (K, 2, 5, 6, 9, 11, 12), Washington only three (1, 3, 8), with three ties (4, 7, 10).

In terms of individual results, BC's Leo Qu and Victor Zheng swept their Washington grade 6 opponents, as did Matthew Geng and Max Gedajlovic in grade 9. Other BC players with a perfect score were Codrin Pompas (K), Daniel Wang (2), Kevin Low (5), Luke Pulfer (7), Nathan Shao (10), and Jeremy Hui (12), while Neil Doknjas (5), Janak Awatramani (11), and Hector Rathburn (12) had plus scores. On the Washington side, Jason Yu (4) and Brandon Jiang (3) had perfect

scores, while those with plus scores were Sophie Velea (1), Roman Chivers (1), Joseph Levine (3), Derek Zheng (8), and Daniel He (11).

The match was organized by Michael Lo, Victoria Jung-Doknjas, Curtis Lister, and Brian Sullivan on the BC side and Chess4Life for Washington; the team captains were Victoria Jung-Doknjas and Curtis Lister (BC) and Elliott and Raphael Neff (Washington). The chief arbiter was Stephen Wright. Sponsors were the BCCF, Burnaby Junior Chess Club, chesshouse.com, UBC Chess Club, James Chan, Victoria Chess, Victoria Junior Chess Society, Save On Foods, and chess2inspire – many thanks to all. [Match website](#); [previous results](#)

Overall Washington now has a 13-11 lead in match victories, with one draw:

*the lack of a result for 2007 corresponds to moving the event from December to April/May within the school year. Note that neither team has been able to win the match three years in a row.

Two games from the match, one an endgame, the other sacrificial; the remaining games are in the attached PGN file.

BRUCE HARPER ANNOTATES

Harper, Bruce - Opponent [A00] ICC 3 0 Internet Chess Club

Today's game is a relaxing, mid-May positional affair. Are there any tactics in this game at all? Let's see.

1.g3 [0:02:57] 1...c6 [0:02:59] 2.Bg2 [0:02:56] 2...d5 [0:02:59] 3.d3 [0:02:56] 3...Nf6 [0:02:58]
4.Nc3 [0:02:55] 4...g6 [0:02:58] 5.Bd2 [0:02:54]

We've seen this before. **5...d4!**? [0:02:56] Black takes the bull by the horns. White doesn't mind, because the h1-a8 diagonal is opened for his g2-bishop, while the a1-h8 diagonal is now blocked for Black's g7-bishop. That's the idea, at least. **6.Ne4** [0:02:52] **6...Nxe4** [0:02:54] **7.Bxe4** [0:02:51] 7.dxe4 is sharper. **7...Bg7** [0:02:53] The engine likes Black after 7...Qb6, but I don't like the engine, so we're even. **8.Qc1** [0:02:50] **8...h5!**? [0:02:51] Another interesting move - Black prevents the possible exchange of his g7-bishop. **9.h3!**? [0:02:43] **9...Nd7** [0:02:49] Black has taken only 11 seconds up to this point, so it's not as though he's given his moves much thought. That's fine, but this approach soon catches up with him. **10.Bg2** [0:02:40] White withdraws his bishop so he can develop with

Ng1-f3 without getting it trapped. **10...Ne5!**? [0:02:47]

11.c3 [0:02:36] A logical break, although 11.f4 was a viable option. **11...h4** [0:02:43] **12.g4** [0:02:34] 12.cxd4 was better, but 12.g4 was faster. **12...c5** [0:02:38] **13.f4** [0:02:29] **13...Nc6?!** [0:02:36]

This allows White to execute an interesting positional idea, which works to perfection. I took two seconds for the next move, which is revealing. Of what, I'm not quite sure. **14.Bxc6+!**? [0:02:26] **14...bxc6** [0:02:35] **15.c4!?** [0:02:24]

At this point the engine slightly prefers Black's position. Maybe it's right, but White at least has a plan - or a concept, at any rate. **15...Qd6** [0:02:29] **16.Nf3** [0:02:21] **16...a5** [0:02:23]

17.Kd1! [0:02:19] I'm giving this an exclamation mark because: a) it's cool; and b) I saw Karpov do it in a similar position. Maybe it should get two exclamation marks? White's king is well situated on c2. How White will exploit Black's mildly weak c-pawns is anyone's guess at this point. There is also Black's wayward h4-pawn to consider, though. **17...a4** [0:02:21] **18.Kc2** [0:02:18] **18...f6** [0:02:15]

19.Qg1 [0:02:14] 19.Qe1 won a pawn, but 19.Qg1 is more photogenic. I didn't want to be greedy, even though I am. **19...Bd7** [0:02:13] **20.e4!?** [0:02:04] Daring Black to take en passant. **20...dxe3** [0:02:12] **21.Bxe3** [0:02:02] **21...a3** [0:02:09] **22.b3** [0:01:59]

I made this move intentionally, setting a positional trap. White isn't yet threatening Black's c5-pawn, by the way, because White's f4-pawn would then be undefended. **22...f5!?** [0:02:05] **23.g5** [0:01:57] The engine recommends 23.Bxc5 anyway, but I had my heart set on sacrificing the exchange. **23...Bxa1?** [0:02:00] The materialistic engine endorses this move, but I think it's awful, because now White gets total control of the dark squares and Black's d7-bishop becomes almost useless. **24.Qxa1** [0:01:55] **24...0-0** [0:01:48] **25.Rd1** [0:01:46] **25...Be6** [0:01:47] **26.Qc3** [0:01:31] **26...Qc7** [0:01:43] **27.Ne5** [0:01:24]

To paraphrase Jabba the Hutt, "this is my kind of position". All of White's pieces are better than Black's, and it's now clear that this is not a good position for rooks. White's e5-knight is especially dominant, while his dark-squared bishop will play the role of the Grim Reaper, harvesting Black's pawns. Chess advice - the only way to screw up this kind of position, other than losing on time, is to capture so many Black pawns (and the wrong ones) that Black's rooks get into play. **27...Rhg8** [0:01:40] **28.Bxc5** [0:01:21] **28...Rd6** [0:01:32] **29.b4** [0:01:06] No thanks. 29.Bxd6? exd6 would be a terrible positional mistake. **29...Rgd8** [0:01:29] **30.Qxa3** [0:01:04] Capturing this pawn, on the other hand, could turn out to be useful, especially since it gets White's queen into the game. **30...Rd4?** [0:01:23]

I'll give this move a question mark, just for fun, and because it loses the house. But Black's position was dreadful anyway. **31.Qa8+** [0:01:01] **31...Qb8** [0:01:21]

32.Qxb8+ [0:01:00] The engine cheekily points out that White can win Black's e6-bishop with 32.Qxc6+. But from a human point of view (at least this human's point of view), Black's e6-bishop isn't worth taking. **32...Kxb8** [0:01:20] **33.Nxc6+** [0:00:59] **33...Kc7** [0:01:19] **34.Nxd4** [0:00:57] Black resigns. Black couldn't stand it anymore. **1-0**

ARTURO POMAR SALAMANCA (1 September 1931 – 26 May 2016)

The legendary Spanish grandmaster Arturo Pomar has passed away in Barcelona at the age of eighty-four. A professional player and the first Spanish grandmaster (1962), Pomar was famous as a child prodigy but never quite fulfilled the promise of his youth. He played in his first international event in Madrid at age eleven in 1943. At twelve he drew with Alexander Alekhine in a tournament at Gijón; if [Wikipedia](#) is to be believed, Pomar still holds the record for the youngest player to draw with a reigning world champion at a normal time control (although they incorrectly state he was thirteen at the time). Pomar won the Spanish championship seven times and played on the Spanish Olympiad team twelve times in succession, 1958-1980.

In 1952 Pomar, after finishing second behind Gligoric at Hollywood 1952 (where one of his victims was [Lionel Joyner](#)), made a cross-Canada tour, with stops in Quebec City, Montreal, Ottawa, Saskatoon, Edmonton, Calgary, and Winnipeg. In Ottawa he drew an exhibition game with Dr. Feodor Bohatirchuk, and in Winnipeg he played a seven-board clock simultaneous display where one of his opponents was Dr. Nathan Divinsky. In honour of Pomar's passing we present these games below, along with games against Suttles, Biyiasas, and Piasetski.

Alekhine, Alexander - Pomar Salamanca, Arturo [C84] Gijón, 1944

Alekhine took an interest in Pomar and devoted part of his last book *¡Legado!* (1946) to the prodigy. It appears Divinsky acquired a copy in 1948, and Pomar added a dedication and his signature when he visited Winnipeg in 1952:
