## HERE AND THERE

### Vancouver Open (October 8-10)

This year's Vancouver Open, organized, directed, and hosted by Eugenio Alonso Campos at his Surrey home, attracted twenty-four players, the majority juniors. And it was juniors who took the top three places: Alec Chung and Callum Lehingrat tied for first with 5.0/6 each, closely followed by Chuyang Gu with 4.5 points. Another junior who did well was Lucian Wu, whose 4.0/6 translated into a rating gain of 140 points. He tied for fourth with top-ranked Paul Leblanc (who lost to Wu), Ulvi Ibrahimov, and Jonathan Steif. We are uncertain about other prizes as a complete list of winners is not available, but other making significant ratings gains were Ethan Su and Kevin Tang. [CFC crosstable](#)

### 3<sup>rd</sup> Millionaire Chess (October 6-10)

There were a number of changes to this year's edition of Maurice Ashley's Millionaire Chess tournament. Apart from moving from Las Vegas to Atlantic City, the entry fees were lowered (beginning at \$549!) and the prize fund was also smaller, guaranteed at \$300,000 rather than the namesake million, with a first prize of \$30,000 (down from \$100,000 last year). This was an attempt to keep the event commercially viable, but with only 450 entrants the tournament lost money again and it seems likely this will be its last year. Moving to Atlantic City to be closer to East Coast population centres did not have the desired effect, and a scheduling conflict with the Isle of Man International (below) didn't help either.

Winner of the overall first prize was Dariusz Swiercz (Poland), who beat Gawain Jones (England) in the final (the tournament consists of a seven-round Swiss to produce four finalists who then play a knockout on 'Millionaire Monday' for the top prizes in each section). Players from this province who made the journey were Houshyar Ghandi, Patrick Huang, and Davaa-Ochir and Uranchimeg Nyamdorj; other entrants included H.G. Pitre and Josh Sinanan from Washington State. Last year Davaa placed fourth in the U2200 Section; this year his sister Uranchimeg tied for fourth place in the U2000 Section with 5.5/7 but lost the playoff to move on to Millionaire Monday. However, this was still worth \$940, plus she won one of the female prizes for an additional \$300. The section prizes went down to fortieth place, and Houshyar Ghandi tied for twenty-third in the U1800 Section, also worth \$300. [Tournament website](#)

### Isle of Man International (October 1-9)

One of the strongest swiss events this year has just taken place on the Isle of Man, an island in the Irish Sea between England and Ireland. Sponsored by the chess.com website, the Scheinberg Family and various local organizations, the one hundred and thirty-three player Masters Section

included forty-eight grandmasters, seven of them rated over 2700. Pavel Eljanov and Fabiano Caruana tied for first with 7.5/9 with Arkadij Naiditsch third. Also participating was Brian McLaren; he drew with Indian GM Shardul Gagare in the first round, and was subsequently paired with sixteenth-ranked UAE GM Saleh Salem in the second. Brian scored 3.5/9, including a half-point bye. [Tournament website](#)

**World Youth Chess Championship (September 22 – October 3)**

In the U16 Section of the Khanty Mansiysk WYCC James Li had 4.0 points out of seven games but could only draw one of his last four games. Nevertheless his final score of 4.5/11 equated to a 2105 performance rating. Best Canadian scores were achieved by Michael Song and Maili-Jade Ouellet (6.0 points each) but they both underperformed. ## Vancouver West Open #11 (October 1-2)

The eleventh edition of the Vancouver West Open had the usual tripartite format: a two-day open section, a two-day junior section, and a one-day junior section. The first two were both CFC-regular and CMA rated, the latter only CMA rated. Twenty players registered for the Open Section but most of the highly-rated usual suspects were missing, Davaa-Ochir Nyamdorj being the only player rated over 2000. However, Davaa did not have everything his own way – in round five he lost to rising junior Andrew Hemstapat, who also had a good result at the recent Langley Open. This resulted in Davaa and Andrew tying for first with 5.0/6; as a consequence Andrew pushed his rating over 2000 for the first time. Ulvi Ibrahimov won the first U1700 prize, Jonathan Steif the second (although he's actually rated under 1300), and Jerry Wang won the U1300 prize.

In the Junior 2-day Andrew Xu dominated, taking the U1300 trophy with a score of 5.5/6, a point and a half ahead of the field. Ryan Yang won the U1500 trophy, Gillian Mok the U1000, and medals were awarded to Henry Yang, Ethan Song, Brian Yang, Bill Wang, and Veronica Guo. And in the Junior 1-day trophies went to Raymond Zhang (U800), Aaron Vickers (U600), and Edward Jeong (U400), and medals to Codrin Pompas, Jermey Liang, Kirill Zubo, and Kiran Sun. 8 <b>Salcedo, Daniel</b>	1996	0	0	0	½	0	½	0	*	<b>1.0</b>

Irving K. Barber Learning Centre, UBC  
Average rating 2277

This year the BC Closed Championship, now one hundred and one years old, returned to the Irving K. Barber Learning Centre at UBC, where it was also held in 2009 and 2012. The field included four FMs rated 2350 or above: defending champion Jason Cao, former champion Tanraj Sohal, Russian Grigorii Morozov, currently living in Richmond, and former many-time Manitoba champion Kevin Gentes (now a resident of Surrey). Unsurprisingly the race for first was between these four, and they were the only players who led the tournament at some point, as indicated in red on the cumulative score table below:

	1	2	3	4	5	6	7
1 Cao, Jason	0.5	1.5	2.5	3.0	3.5	4.5	5.5
2 Gentes, Kevin	1.0	2.0	2.5	3.0	3.5	4.0	5.0
3 Sohal, Tanraj	0.5	1.5	2.5	2.5	3.0	3.5	4.0
4 Doknjas, Joshua	0.0	1.0	1.0	2.0	2.5	3.0	3.5
5 Morozov, Grigorii	1.0	1.0	1.5	2.0	3.0	3.0	3.5
6 Doknjas, John	0.5	0.5	1.0	1.5	2.0	2.5	3.0
7 Kenney, Jason	0.5	0.5	1.0	2.0	2.0	2.5	2.5
8 Salcedo, Daniel	0.0	0.0	0.0	0.0	0.5	1.0	2.0

With one exception all the games between Cao, Sohal, Morozov, and Gentes were drawn. The exception was Cao's win over Morozov, which proved decisive in deciding the final standings. However, the player who had the biggest influence on the results was the youngest, Joshua Doknjas. He defeated Morozov in round two and Sohal in round four (although had Tanraj found 28...Nxd4! the tournament may have been very different). This left the outcome largely as a two-man race. In round six Cao won over Morozov but Gentes was unable to convert a favourable position against Sohal (he also missed chances against Jason Kenney in round three (32.Bxe6!)). Both won in the last round, leaving Cao as the deserved winner with Gentes second by a half point. This also means Cao has completed a hat-trick by winning the last three championships in a row; he is quietly establishing a dynasty, and is still only fifteen years old.

Vancouver, 7-9 October 2016	1	2	3	4	5	6	
1 <b>Gansvind, Valeria</b>	2258	*	1	1	1	1	- <b>4.0</b>
2 <b>Gu, Stephanie</b>	994	0	*	1	½	½	- <b>2.0</b>
3 <b>Van, Anna</b>	1178	0	0	*	1	1	- <b>2.0</b>
4 <b>Tian, Sherry</b>	1520	0	½	0	*	1	(1) <b>1.5</b>
5 <b>Guo, Veronica</b>	989	0	½	0	0	*	- <b>0.5</b>
6 <b>Zhou, Annika</b>	1522	-	-	-	(0)	-	* -

Held concurrently alongside the Closed was the BC Women's Championship, using the recent new regulations for [qualification](#). For various reasons a number of players declined their invitations, leading to a rather lopsided field, compounded by the withdrawal of a competitor after one round due to illness. As expected WFM Valeria Gansvind was the winner with a perfect score, and most of the interest developed around who would come second. In another demonstration that rating of juniors can sometimes be rather inaccurate, Stephanie Gu and Anna Van shared second ahead of the higher-rated Sherry Tian.

## BRUCE HARPER ANNOTATES

Harper, Bruce - Opponent [A00] ICC 3 0 Internet Chess Club

1.g3 [0:03:00] 1...d5 [0:02:58] 2.Bg2 [0:02:59] 2...Nf6 [0:02:57] 3.d3 [0:02:58] 3...g6 [0:02:55] 4.Nc3 [0:02:57] 4...Bg7 [0:02:54] 5.Bd2 [0:02:57]

We've seen this before - I christened this the "Suttles system". It's not actually that bad. 5...d4 [0:02:51] The direct approach. Positionally White's h1-a8 diagonal is opened, while Black's a1-h8 diagonal is closed. Naturally chess isn't really that simple, but from White's point of view 5...d4 is a step in the right direction. Tactically, White's response invites a trade of knights, which removes a defender from Black's kingside. But a defender against what? 6.Ne4 [0:02:55] 6...Nxe4 [0:02:50] 7.Bxe4 [0:02:55] 7...0-0 [0:02:48] 8.Qc1 [0:02:54]

Part of White's opening idea. He takes control of the c1-h6 diagonal and "threatens" to trade off Black's dark-squared bishop. Black spends a tempo preventing this. 8...Re8 [0:02:46] 9.Bh6 [0:02:52] 9...Bh8 [0:02:45] 10.h4! [0:02:51] Here is the start of White's attack! Shockingly, the engine agrees that 10.h4! is White's strongest move. Black doesn't panic - yet. 10...Nd7 [0:02:37] 11.h5 [0:02:49] 11...Nf6 [0:02:36] 12.hxg6 [0:02:48] 12...hxg6 [0:02:32] It's always hard to choose between a permanent structural weakness (12...fxg6) and more immediate danger (12...hxg6). Black decides, probably rightly, that the risk of being attacked down the h-file is acceptable. 13.Bg2 [0:02:46] 13...c6 [0:02:26]

**14.Qg5** [0:02:40] A normal move like 14. Nf3 was better, but this was a three-minute game and White was already ahead on time. Since Black took 20 seconds on his reply to 14.Qg5, it's hard to criticize White's choice. **14...e5** [0:02:06] **15.Qh4** [0:02:37] Now White might be threatening something, although it's more accurate to say he's threatening to threaten something. **15...Nh5?!** [0:02:00] NOW Black starts to panic. White actually didn't yet have anything concrete on the h-file, but sometimes it's enough to look scary. **16.Bg5** [0:02:15] Of course White doesn't want to trade queens. **16...Bf6** [0:01:58] **17.Nf3** [0:02:13] **17...Bf5?** [0:01:39]

A fatal mistake. Black didn't miss White's next move, but instead misjudged the position, as he took 20 seconds to play 17...Bf5 and only three seconds on his reply to White's next move. **18.g4!** [0:02:08] **18...e4** [0:01:36]

This appears to be clever, but it's not. **19.dxe4** [0:01:48] This works, but the simplest refutation was 19.Bxf6! Qxf6 (19... Nxf6? 20.Qh8 mate) 20.gxh5, and since Black's queen is hanging he is forced to play 20...Qxh4, allowing White's f3-knight to nimbly save itself with 21.Nxh4, which also attacks Black's f5-bishop (21...exd3 22.Bf3 ends Black's dreams of attack). **19...Rxe4** [0:01:33] **20.Bxf6** [0:01:47] **20...Qa5+** [0:01:16] **21.Kf1** [0:01:43] **21...Rxc4** [0:01:15]

**22.Qxh5!** [0:01:39] I actually saw this when I played 18.g4! The prosaic 22.Qh2 also was winning, as White is a piece ahead and his f6–bishop is taboo (22...Nxf6 23.Qh8 mate). **22...gxh5** [0:01:13]

**23.Rxh5** [0:01:37] **23...Rg7** [0:01:03] 23...Kf8 was better, but the real point is that 23...Bh7 is impossible because of 24.Rxa5. Chess sometimes is played on the entire board! **24.Nxd4!** [0:01:20] The engine and I are getting along this time. White's pieces are coordinating beautifully. Black's pieces, in contrast, are disappearing. **24...Qd2** [0:00:35] **25.Nxf5** [0:01:14]

Threatening 25.Ne7+, with a quick mate. **25...Re8** [0:00:34] **26.Bf3** [0:00:58] Overly cautious - 26.Nxg7 was simple enough. **26...Re6?** [0:00:32] By this time Black was groggy. He had 26...Rh7, but with three pieces, a pawn and an attack for his queen, White is still winning. **27.Bxg7** [0:00:55] **27...f6** [0:00:25] **28.e4?** [0:00:41] Missing 28.Rh8+ Kf7 29.Bh5 mate. I often play badly when I'm irritated that my opponent hasn't resigned. **28...Kf7** [0:00:23] **29.Rh8** [0:00:36] Threatening 29.Bh5 mate. Where was this tactical acumen last move? **29...Kg6?!** [0:00:16] **30.Bh5+** [0:00:35] **30...Kg5** [0:00:14]

**31.Bh6+** [0:00:34] When it comes to material I seem to see stuff... **31...Kxh5** [0:00:10] **32.Bxd2+** [0:00:34] **32...Kg6** [0:00:09] **33.f3** [0:00:32] Black resigns. Apparently both 33.Rh6+ and 33...Rg8+ force mate in eight moves. I don't mind missing that kind of mate. **1-0**

## BROWSING FOR ENDGAMES by Dan Scoones

Today's browsing comes from the January 1964 issue of *Shakhmatny Bulletin*, which featured a selection of games from the 1963 Capablanca Memorial tournament in Havana. This hard-fought, marathon event was won by the current Soviet Champion Viktor Korchnoi, half a point ahead of his compatriots Efim Geller and Mikhail Tal and the Czech grandmaster Ludek Pachman. In his report in the November 1963 issue of *Chess Review*, Petar Trifunovich offered the opinion that Efim Geller had played the best chess in the tournament. In particular he singled out Geller's long endgame win over Borislav Ivkov in which the Soviet grandmaster ended up playing with a rook against five pawns. Unusually for this column, we will analyze the entire game because the initial part was in many ways a leadup to the endgame that followed.

### Geller, Efim P. - Ivkov, Borislav [C97] Capablanca Memorial Havana (18), 1963

**1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 d6 8.c3 0-0 9.h3 Na5 10.Bc2 c5 11.d4 Qc7 12.Nbd2 Bd7** The so-called Yugoslav Wall was a favourite of Ivkov as well as his compatriot Svetozar Gligoric. Black develops a piece to a central post and waits to see what his opponent will do. **13.Nf1 Rfe8 14.b3 g6 15.Bg5 Be6 16.Ne3 Rad8 17.Rc1** Interesting was 17.d5 Bd7 18.Nxe5!? fxe5 19.d6 Qxd6 20.Qxd6 Bxd6 21.Bxf6 Rc8 22.Nd5 with an edge for White. **17...Nh5 18.b4 Nc4 19.Bxe7 Rxe7 20.Nxc4 Bxc4 21.bxc5 dxc5 22.d5 Qc8?** A serious error. It was time for 22...Nf4! 23.Qd2 (23.Nd2 Nd3) 23...f5!? with interesting complications. **23.Nd2! Bxa2 24.Ra1 Bxd5** This piece sacrifice is more-or-less forced since 24...Bc4 25.Nxc4 bxc4 26.Qe2 Nf4 27.Qxc4 left White with a near-decisive advantage. **25.exd5 Rxd5 26.Qe2 Qd8 27.Nf1** Here White had the option of returning the material with 27.Ne4!? f5 28.Rxa6 fxe4 29.Bxe4 Rd2 30.Qxb5. **27...Re6 28.Red1** Also possible was 28.g3!? c4 29.Ne3 Rd2 30.Red1 Rxd1+ 31.Rxd1 Rd6 32.Rxd6 Qxd6 33.Qf3 Nf6 34.g4 with advantage to White. **28...Rxd1 29.Rxd1 Rd6 30.Re1 Re6 31.c4 Nf4 32.Qe3 Qd4 33.Rd1 Qxe3 34.fxe3 Ne2+ 35.Kf2 Nc3 36.Rd8+ Kg7 37.Rc8 b4**

**38.Nd2?!** Although Black has three pawns for the piece, White has a big advantage here. The text move complicates his task unnecessarily because it allows Black's rook to become active. Stronger was 38.Ke1! a5 39.Ra8 a4 40.Bxa4 e4 41.Ra5; for example 41...Re5 42.Bc2 h6 43.Nd2 Rg5 44.Bxe4 Nxe4 45.Nxe4 Rxc5 46.Rxc5 b3 47.Rb5 b2 48.Nd2 Rh2 49.Rxb2 Rxh3 50.Ke2, and White's c-pawn will eventually cost Black the game. Note in passing that 38.Rxc5? would be a serious blunder on account of the reply 38...b3!, recovering the piece and winning for Black in all variations.

**38...a5 39.Ra8 Rd6 40.Ke1 a4 41.Bxa4 Rd3 42.Nf1 Nxa4 43.Rxa4 Rc3 44.Nd2 Rxe3+ 45.Kd1 f5 46.Ra5 Rg3 47.Rxc5 e4**

**48.Rc7+** Both sides have been working hard -- White to increase his advantage and Black to neutralize it. Here it was probably better to eliminate Black's b-pawn right away: 48.Rb5 Rd3 49.Ke2 Rg3 50.Rxb4 Rxc2+ 51.Ke1 Rg1+ 52.Nf1 Rg2 53.Ne3 Rg1+ 54.Kf2 Rc1 55.Nd5 and White should be winning. **48...Kf6 49.c5 Rxc2 50.c6 e3**

**51.Nc4?** After his previous small inaccuracies, White must now find the sharp line 51.Nf3!? Rf2 52.Rc8! Ke7 53.Rb8 Kd6 54.Nd4! in order to win. For example, 54...Rd2+ 55.Ke1 b3 56.Nxb3 Kc7 57.Rb4 Rb2 58.Rb7+ Kc8 59.Nd4! Rxb7 60.cxb7+ Kxb7 61.Ke2 f4 62.Ne6 Kc6 63.Nxf4 and Black has to resign. But the summer heat of Havana is also affecting White's opponent... **51...f4?** Black has been presented with a golden opportunity to stay in the game with 51...Rg1+! 52.Ke2 Rc1! 53.Nxe3 b3! Now White has nothing better than 54.Rb7 Rxc6 55.Rxb3. After this he still has a nominal material advantage, but with all of the pawns on one side of the board it will be difficult for him to make further progress. Here it helps to know that the endgame of rook and knight vs rook is usually a draw unless some clever tactic arises.

**52.Rc8! Rg1+ 53.Ke2 Rc1 54.Rf8+ Kg5 55.c7 Rxc4 56.c8Q Rxc8 57.Rxc8**

Black has almost enough pawns for the rook but unfortunately he is positionally lost. **57...Kh4 58.Kf3 g5 59.Rc6 Kh5** After 59...h5 60.Re1! White will eventually win all of Black's pawns, which Black can postpone only by allowing an immediate mate. **60.Rb6 h6 61.Rxb4 Kg6 62.Rb6+ Kh7 63.h4 Kg7 64.h5 Kh7 65.Rg6 1-0**

## **UPCOMING EVENTS**

### **Vancouver Rapid Chess League 2016-17**

September 2016 - April 2017, various locations

[Details](#)

### **3<sup>rd</sup> Annual LakeCity Open**

October 15, Williams Lake

[Details](#)

### **October Active**

October 15, Columbia College

[Details](#)

### **Junior Nightmare Quads**

October 16, Burnaby

[Details](#)

### **November Active**

November 5

[Details](#)

### **BC Junior Championship**

November 11-13, Richmond

[Details](#)

### **Jack Taylor Memorial**

November 18-20, Victoria
