### HERE AND THERE

#### **International Chess Day** (July 20) by Konstantin Pyryaev

[International chess day occurs on July 20, the day FIDE was founded in 1924]

Five years ago we played chess on the giant board to celebrate International Chess Day. We did it every year and this Friday the Chigorin Chess Club invites everyone to join us here:

Ontario & 18th, Vancouver, BC.

If you want to play at any other location, i.e., Morgan Crossing (South Surrey), Pacific Centre (Downtown) or any other location - it's great! My favourite format is five minute blitz two vs two. Gens una sumus!

#### **World Open** (July 3-8)

The forty-sixth edition of the World Open took place at the Marriott Downtown in Philadelphia, the same site as and immediately following the Philadelphia International. Among the Canadians participating were a dozen from this province, including Stephanie Gu, Patrick Huang, Winston Huang, Eric Jiang, Ethan Low, Kevin Low, Tanraj Sohal, Brian Yang, Ryan Yang, Nathan Wu, Nicholas Wu, and Dezheng Kong. Presumably there would have been more, except this year the World Open was scheduled at the same time as the CYCC and Canadian Open, meaning players (especially the juniors) had to choose which event(s) to play in. (Whether by design or accident, Eric Jiang began play in the U10 Open Section of the CYCC, then after three rounds switched to the World Open.)

It is becoming a bit of a tradition that a BC player wins one of the section prizes at the World Open. In 2016 it was James Li, last year it was Daniel Wang, and this year Stephanie Gu took clear first in the U1600 Section with an undefeated 8.0/9 score, worth \$10,000 USD. She also tied for the third Mixed Doubles prize with American Libardo Rueda. There were a number of other BC prizewinners: Kevin Low tied for the U2100 prize in the U2200 Section, Dezheng Kong tied for third U2200 in the Open Section, Ryan Yang and Winston Huang tied for fourth in the U1400 and U900 Sections respectively, and Eric Jiang and Brian Yang were tied for ninth and tenth respectively in the U1600 and U1800 Sections. The overall winner was Illia Nyzhnyk with 7.5 points, a half-point ahead of Lazaro Bruzon Batista on clear second; best Canadians were Anton Kovalyev and Razvan Preotu with 6.0 points, just outside the prizes. **CYCC** (July 2-5) by Eric Gu, photos by Victoria Jung-Doknjas

This year's CYCC in Quebec City attracted forty-six BC players: William Jiang, Matthew Kofmansky, Boyong Guo, Aiden Lu, Codrin Pompas, Haoze Wang, Jayden Qu, Erwin Mok in U8 Open (8); Anglina Vozian in U8 Girl (1); Eric Jiang, Eric Shan, Joshua Gao, Joey Xu, Derrick Su, Zhiheng Luo, Winston Huang, Matthew Imoo in U10 Open (8); Gillian Mok, Joyce Zhang in U10 Girl (2); Chuyang Gu, Joshua Imoo, David Jiang, Liyuan (George) Liu, David Eirew in U12 Open (5); Kate (Yuhua) Jiang, Jessica Qian, Elaine Fan, Emilia Vozian, Mengbai Li in U12 Girl (5); Andrew Hemstapat, Neil Doknjas, Rowan James, Leo Chung, Andy Zhang, William Landstrom, Benjamin Zhu in U14 Open (7); Anna Van, Lyvia Shan in U14 Girl (2); Joshua Doknjas, Kai Richardson, Callum Lehingrat, Milo Eirew in U16 Open (4); Andrea Botez in U16 Girl (1); Brandon Zhu and William Bremner in U18 Open (2); Pepi Eirew in U18 Girl (1).

The record-breaking long list is probably because of the tournament location: Quebec City, which "holds both European charm and sophistication alongside its unmistakable French Canadian character."

BC junior players collected two golds and three silvers this year!

U8 Open: William Jiang eleventh

U10 Girl: Gillian Mok fourth, Joyce Zhang eighth

U12 Girl: Jessica Qian won the first place, Kate Jiang took fourth

U14 Open: Andrew Hemstapat finished sixth

U14 Girl: Anna Van finished seventh

U16 Open: Joshua Doknjas won second place

U18: Brandon Zhu won first place and William Bremner second place, well done!

U18 Girl: Pepi Eirew won second place

The way for Jessica and Brandon towards their national championships was wonderful. Jessica Qian got the first gold for BC players. She lost to her close friend, Kate, in round two; this early loss didn't change anything for Jessica's target planned before CYCC, after reviewing with her coach, she won both games in the second day; the third day was critical, Jessica won both games with confidence, especially as black against WCM Julia Tsukerman. Jessica has studied chess for about two years; she loves chess and well organizes her learning. Before the tournament, Jessica prepared opening for her opponents systematically all by herself.

Brandon was the last gold winner for the whole tournament. After he drew in a winning position due to time trouble in the fifth round, Brandon was very upset as it was already his third draw; however, Brandon recovered totally and defeated his opponent in the critical sixth round. After seven rounds, Brandon got 5.5 points together with William Bremner and Andrew Colvin; in playoff, Brandon got 1.5 points and along with national championship U18! Brandon is deserving of his title as he's known to be one of the most diligent chess players in BC in the past three years.

Just after last round of CYCC, the National Bughouse Championship was run with these winners:

- Champion Team: Neil Doknjas and FM Nicholas Vettese
- Second Place Team: CM Joshua Doknjas and WIM Maili-Jade Ouellet

This year John Jiang and Eric Gu established a chatting group for those chess players/parents who are interested to exchange information each other during the tournament. [Tournament website](#).

## **54<sup>th</sup> CANADIAN OPEN (July 7-14)**

Coupled as usual with the youth championships, the Canadian Open was held immediately after the CYCC in Quebec City. The Canadian Open has been held in Montreal five times, including the inaugural event in 1958, and in 1981 the tournament was situated in Beauport, a borough of Quebec City. This was the first time the Canadian Open has been held in the centre of the provincial capital. The turnout of one hundred and fifty-three players was less than the organizers had hoped for; many CYCC participants did not stay on for the Canadian Open (Quebec City does not have the same junior base as other cities) and the tournament lost several marquee players at the last minute (Razvan Preotu chose the World Open instead, and Cuban GMs Nogueiras and Vera were refused Canadian visas, despite having played here many times before). The players from this province included William Bremner, Gilles Bruneau, John, Joshua, and Neil Doknjas, Rowan James, David Jiang, Callum Lehingrat, Jessica Qian, Kai Richardson, and Brandon Zhu.

There were three grandmasters present, Bator Sambuev, John Fedorowicz, and Alexander Cherniaev, but it was only Sambuev who managed to challenge for the top places. Indeed, Sambuev was the sole leader after rounds four and five but overpressed in round six (spurning a triple repetition) and lost to Alberta Champion Bitan Banerjee. He battled back, defeating Cherniaev in round eight to share the lead with Banerjee going into the last round. Banerjee survived a tense game with FM Rodrigue-Lemieux, but Sambuev fell to a player who is no stranger to BC chess, IM Raymond Kaufman, leaving Banerjee and Kaufman sharing first place with 7.0 points each. Raymond had lost in rounds three and five but capped his comeback with wins against former and current Canadian champions Hébert and Sambuev in the last two rounds.

Bitan Banerjee and Raymond Kaufman (photo by Victoria Jung-Doknjas)

Banerjee took the Canadian Open title on tiebreak and pushed his FIDE rating over 2400 so will soon be Canada's newest IM (he had four norms already).

This Canadian Open was divided into sections (U2000, U1800, U1600, U1400) rather than everyone playing together, and two of the sections were won by BC CYCC prizewinners. In the U2000 Section William Bremner, who placed second in the U18 CYCC, gave up just two draws in claiming first prize with 8.0/9, while new Canadian U12G champion Jessica Qian beat everyone she played to come first in the U1400 Section. It should also be noted that back in the Open Section FM John Doknjas had the distinction of playing all three grandmasters and drew with two of them. ## BRUCE HARPER ANNOTATES

### Opponent – Harper, Bruce [A42] ICC 3 0 Internet Chess Club

This game is one of those big, blocked positions that I was raised on by Grandmaster Duncan Suttles. If you're not familiar with the ideas, it is easy to fall into a bad position for either side.

**1.d4** [3:00] **g6** [3:00] **2.c4** [2:59] **Bg7** [3:00] **3.Nc3** [2:57] **d6** [2:59] **4.e4** [2:56] **Nc6** [2:58] **5.Be3** [2:53] **e5** [2:57] **6.d5** [2:50] **Nce7** [2:56]

[diagram]

**7.Qd2?!** [2:48] A very common choice for White on ICC, but there are a number of better options. **7...f5** [2:55] **8.f3** [2:47] **Nf6** [2:54] **9.Bd3** [2:43] **0-0** [2:53] **10.Nge2** [2:39] **c5** [2:52] The engine is not impressed by this move, which aims to slow down White's queenside play. Since Black effectively has a King's Indian Defence with an extra tempo or two, there are viable alternatives for Black, including **10...fxe4**. **11.h3?!** [2:33]

This move is worth a comment. 11.h3 threatens 12.g4, blocking the kingside, and allows White to open the h-file if Black launches a kingside pawn attack with ...f5-f4 and ...g6-g5-g4. However, it also gives Black a target on the kingside. **11...f4!** [2:49] **12.Bf2** [2:31] **g5** [2:48] **13.a3** [2:29] White starts his own advance on the queenside. The engine, which fears nothing except power outages, gives White a small edge in this position, and with accurate play it might be right. But this is a 3-minute game, and Black's position is easier to play (in my opinion, at least). **13...Ng6** [2:47] **14.b4** [2:27] **b6** [2:46] **15.bxc5** [2:22] **15...bxc5** [2:45] **16.Qb2?!** [2:16] This seems unnatural. **16...h5** [2:42] **17.Rb1** [2:14] **g4** [2:36] **18.hxg4** [2:12] **hxg4** [2:35]

**19.Nb5?!** [2:08] This is a blank shot which just loses time. **19...g3!?** [2:32] The right way to handle the position for Black. **19...g3!?** transfers the base of White's pawn chain to g2, which is not easy to attack, but is even harder to defend. And should Black succeed in destroying White's pawn chain, his kingside pawns will become dangerous. **20.Bg1** [2:05] **Nh7** [2:31] **21.Qb3** [1:56] **Bf6** [2:27] **22.Qa4** [1:55] **Rf7** [2:23] **23.Kd2?** [1:49] **Nh4** [2:20]

Oops! White can't defend his g2-pawn, and so is forced to give up the exchange. On the bright side, in a blocked position like this, rooks are less valuable than normal. But they are still rooks. **24.Rxh4** [1:42] **Bxh4** [2:20] **25.Nbc3** [1:37] **Be7** [2:12] **26.Nb5** [1:25] **Bf8** [2:03] **27.Nbc3** [1:22] **Ng5** [2:01] **28.Rb2** [1:14] **Rb7!** The exclamation mark is for finally making this move, which Black could have made earlier on several occasions. Exchanging rooks makes perfect sense, because Black has two rooks and White only has one. [1:56] **29.Rxb7** [1:10] **Bxb7** [1:56] **30.Nc1** [1:07] **Bc8** [1:31] **31.Qc6** [1:04]

**31...Bd7** [1:28] Black could have played the more vigorous **31...Bh3!**, but I was lazy and was playing "by position." Kasparov is always criticizing this approach, and he's right. **32.Qa6** [1:03] **Qb6** [1:26] **33.Qxb6** [0:56] **axb6** [1:26] **34.Nb1** [0:49]

While Black has been cautious, eliminating even a hint of White play on the queenside, he hasn't ruined anything, as his next move demonstrates. **34...Bh3!** [1:20] Attacking the foundation of White's position. **35.gxh3** is met by **35...Nxf3+** and **36...Nxb1**, but White's actual reply is no better. **35.Bf1** [0:45] **Nxf3+** [1:19] **36.gxf3** [0:41] **Bxf1** [1:19] **37.Kc3** [0:38] **Bg2** [1:14]

"A strategic triumph," they might have said. It's more accurate to say that things worked out the way Black hoped... White resigns. **0-1**

## CHESS AND LIBRARIES

Chess and libraries (and their predecessors – reading rooms, literary institutes, Mechanics' Institutes) have had a long history in this province which continues to this day – [Chess2Inspire](#) offers beginner's classes at the Richmond Brighthouse Public Library, while the [Victoria Chess Club](#) meets at the Central Branch of the Victoria Public Library.

The first libraries in the province were those set up by fur-trading companies (North-West Company and Hudson's Bay Company) for the benefit of their employees. After gold was discovered on the Fraser River in 1858 the first large-scale settlement of the Vancouver Island and British Columbia colonies began, and various reading rooms, literary institutes, and commercial libraries, often part of stationary or dry goods stores, followed. These operated on a subscription basis and made books, magazines, and newspapers available. Soon after the gold rush began a reading room “in conjunction with a saloon” opened in Victoria; this was followed by one operated by the Young Men's Christian Association, and soon a fully-fledged Victoria Literary Institute was formed. Another organization, popular in England, was the Mechanics' Institute. Originally designed to provide technical instruction for those workers moving from agrarian to factory employment during the industrial revolution, they had evolved into social institutes with book collections, readings, and cultural and scientific lectures; the Victoria branch which opened in 1864 also included debating and chess clubs. One of the founding board members in Victoria was [Lieutenant Edmund Verney](#), known as a chessplayer from other sources, although to what degree he was involved with the chess club is unknown.

Verney

While perhaps not directly promoted, chess was certainly accepted in light of the Victorian ethos of 'rational recreation,' by which workers were encouraged to seek leisure activities which led to self-improvement and a better society. This philosophy was “promoted by business and religious leaders who wanted men to spend their free time doing something other than drinking alcohol. The owners of mines and mills apparently believed that having little libraries would increase the chances of their employees showing up for work on time – and sober as well.” On this continent there was the example of the [Mechanics' Institute](#) in San Francisco, which opened in 1854 to meet the vocational needs of out-of-work miners after the 1848 California gold rush. The chess club the building houses is the oldest continually-operating US chess club.

Closer to home, a Mechanics' Institute was founded in the northshore community of Moodyville in 1869. A combined community hall/library/reading room/masonic lodge, the monthly meeting minutes of 1 March 1869 record the donation of a chess board:

Moved by Mr. P.W. Swett, seconded by Mr. Cunningham  
Received that the thanks of the Institute are due to Mr. J.T. Scott of New Westminster for the handsome present of chess and checker board and that the secretary be instructed to inform Mr. Scott by letter of the passage of this resolution. Carried

This same sequence of reading rooms leading to literary/Mechanics' institutes occurred in many communities as they grew and developed, and eventually these organizations evolved into the first free public libraries. This culminated at the beginning of the twentieth century in the awarding of three Carnegie libraries to BC, in Vancouver, Victoria, and New Westminster (opened 1903, 1905,

and 1905 respectively). We have the following entry in the Vancouver Library Board monthly minutes of 11 February 1904:

A letter from the City Clerk was read enclosing a communication addressed to the Mayor and Council signed by several citizens on behalf of the Young Men's Club of the Princess Street Methodist Church of the restriction by the late Library Board in preventing the playing of chess and checkers in the new Carnegie Library – after some discussion a resolution was moved and carried unanimously withdrawing the restriction and the librarian was instructed to place the chess tables in the vacant room on the first floor of the library and give access to players, and also to provide additional chessmen and checkers if needed.

One wonders why chess was banned in the first place, but that information has apparently not survived.

Moodyville Mechanics' Institute

Vancouver's Carnegie Library

Postscript: the San Francisco Mechanics' Institute recently made its [visitor's register](#) available online. Here are the signatures of visitors with BC connections:

27 Feb<sup>114</sup> Thos H. Piper  
Victoria B.C.

[Thomas H. Piper](#)

3/16/29 W de Havilland  
Hotel St. Francis Dr. Cal.

[Walter de Havilland](#) (1929)

1/15/32 W de Havilland  
Wm Taylor Hotel

Walter de Havilland (1932)

Peter Biyiasas

Jonathan Berry (1999)

Incidentally there seems to have been lots of blank space left over the years which was subsequently filled out of order – a half dozen entries above Biyiasas' signature one finds Alexander Alekhine (poetic since Biyiasas' hero was Capablanca).
