## HERE AND THERE

### Online adventures

Brothers Peter Yong Qiu and Andrew Yu Qiu from Surrey were participants in various of the events which constituted the Thornhill Chess Club Grand Prix. They both qualified for the [Grand Prix Finals](#), held on October 11 as a five-player round robin. The overall winner was Sebastien Azar who scored 3.0/4; Peter tied for second with Andrew Colvin a half-point back, while Andrew finished with 1.5 points.

### Extension - Internet Rated Games and COVID-19 Rating Incentive

From the [CFC Forum](#):

The CFC is extending to January 1st, 2022 the interim policy to accept internet events for Quick (Active). The COVID-19 rating incentive will also be extended until January 1st, 2022. Players who play a minimum of ten CFC rated games between October 1st, 2020 and January 1st, 2022 and who attain a Quick rating that is 200 points higher than their Regular rating will have their Regular rating increased by 200 points. The minimum time control for qualifying events is 25 minutes per player including increments. The total time is calculated based on a sixty-move game. For example, 15 minutes per player plus a 10 second increment is 25 minutes per player.

The COVID-19 rating incentive can only be earned once in a player's lifetime where pre-bonus rating exceeds 1200. Players with ratings under 1200 are eligible for up to four 200-point bonuses in their lifetime up to a maximum rating of 1400. Only paid-up CFC members are eligible for this incentive.

Players, TDs or organizers may forward applications to the CFC by e-mail. Otherwise, a review will be conducted and bonus points added at the end of the incentive period.

**2021 BC CHAMPIONSHIP** (October 8-11) by Paul Leblanc  
**FM John Doknjas new Provincial Champion**

After a one-year COVID induced hiatus, the most important event on the BC chess calendar, the BC Championship, resumed at the Hotel Grand Pacific in Victoria on the Thanksgiving Weekend. FM John Doknjas clinched the title with a hard-fought draw against NCM Neil Doknjas in the last round. It turned out to be John's first-round victory over second-place finisher NM Jason Kenney that was the crucial game allowing him to edge out Jason by half a point overall.

The event was hosted by Victoria Chess (Roger Patterson and Paul Leblanc) with assistance from Stephen Wright. The arbiter duties were handled by Paul Leblanc and Elliot Raymer.

[Inaugurated in 1916, the BC Championship has been held continuously with two exceptions: there was no event in 1932, presumably a result of the Great Depression, and the 2020 edition was cancelled because of the pandemic. The fact that the 2021 Championship could be held at all, the first major over-the-board event since the 2020 BC Open, was cause for optimism, but since most of the usual qualifying tournaments were cancelled the normal qualification process had to be modified. The ratings list was relied upon much more than usual, and players were allowed to count CFC-rated online games toward the ten-game activity requirement.

For various reasons a number of our top-ranked players chose not to take part, and this year's event included only three participants from the previous 2019 tournament. Notably since 2013 the championship has been won by just three players (Tanraj Sohal, Jason Cao and Grigorii Morozov), and none of them were available this time round. Making their debuts were Keith MacKinnon and Patrick Huang, although for Scott Morgan it might have felt like a debut – his previous appearance was in 1981.

John Doknjas was the highest-rated player in the field and led the tournament from beginning to end, a deserved winner. His younger brother Neil was his closest competitor for much of the event, but a loss to Jason Kenney allowed the chasing pack to catch up – there was a four-way tie for second after round five. Keith MacKinnon lost a winning position to Neil in the second round and failed to convert other favourable positions which left him out of the prizes. Fully six of the players scored 50% or better, unfortunately at the expense of the other two competitors.]

### **B.C. CHAMPIONS**

So who have been the most successful B.C. champions, at least in terms of the most provincial titles won? The following lists all the players who have won the championship three or more times. (In this case we have included those who were co-champions, even if a tiebreak mechanism was originally used).

#### **Three-time winners:**

William J. Barker (1924, 1926, 1928)  
 Dragoljub Milicevic (1997, 2000, 2001)

**BC CHAMPIONSHIP TROPHIES**

There have been a total of five trophies which have served as emblems of chess supremacy in this province. The current trophy has been in use since 1956, and the individual plaques on it only go back to 1944. But the first BC Championship was in 1916, so what trophies were used before the current one? The first trophy was the Bowser Shield, which was awarded at the initial competition in 1916. The Premier at the time was [William John Bowser](#) (1867-1933), so presumably he paid for

the trophy or it was named in his honour. The winner also received a small gold medal. By 1923 Ewing had won the championship six times and in recognition the Shield was presented to him on a permanent basis, although the exact circumstances as described in a report on the 1924 competition seem a little murky:

The winner, Mr. Barker, gains a gold medal to commemorate his victory in the 1924 tournament, and also has the custody of the Bowser Shield for one year, after which it will be returned to Mr. J.M. Ewing of North Vancouver. Mr. Ewing's series of wins in past years entitles him to keep the trophy permanently, though it had, according to the conditions of its gift, to be played for once again after being permanently won by him last year. [*Daily Colonist*, 22 April 1924]

To provide a permanent replacement for the Bowser Shield, in 1925 Ewing donated the Ewing Cup, won that year by Max Enke. Despite the previous arrangement with Ewing, it was common practice at the time that if a player won a championship three years in a row, they were given permanent possession of the trophy. This feat was accomplished by Charles Millar in 1934, and he offered the Millar Cup in exchange. The Millar Cup was permanently won by Leo Duval in 1943, and its replacement was undertaken by Chris Spencer (1868-1953, President of [David Spencer Ltd.](#), which operated a chain of department stores on Vancouver Island and the Lower Mainland until they were sold to the Eaton Company in 1948). Miervaldis Jursevskis was given the Chris Spencer Cup in 1956, at which point the present trophy came into use; the plaques from the Chris Spencer Cup (i.e., 1944-1956) were copied onto it, which is why the current trophy is younger than the earliest events it commemorates.

Jursevskis with Chris Spencer Cup

In 1957 the new piece of hardware was referred to as the Ed Percy Trophy, Edmund Percy (1902-1987) being a Vancouver jeweller. Presumably he donated or was otherwise responsible for the trophy, although any other connection to chess remains hidden. The next potential permanent winner of the trophy was Dr. Macskasy in 1960, but by then the policy had been discontinued, as noted in the Minutes of a BCCF Council meeting on 30 May 1956:

Mr. Prentice drew attention to the fact that the BCCF was now short of trophies due to three players having gained permanent possession of their trophies. His offer to furnish one of the trophies was accepted with thanks. Mr. McCharles moved that: "In future, trophies be made perpetual, and miniatures given to winners each year, to keep." Duly seconded and carried.

The Ed Percy trophy has remained in use ever since, although around 1994 a bottom tier was added to the base because there was insufficient room for new plaques on the original base. The Chris Spencer Cup remains in the possession of the Jursevskis family, the Ewing Cup now resides in Calgary with one of Charles Millar's granddaughters, but the fate of the other previous trophies is unknown.

## **FOR MY BROTHER AND MY SON AND MY DAUGHTER and whomever else is interested**

A story by Mike Bateman

I stood on the corner waiting for the lights to change. Waiting for the lights as if there was nothing else in the world, and the traffic going passed. A small crowd has gathered and still the cars came flashing past. I found myself wondering about those people around me as though they were looking from my eyes. A pretty girl in a red dress, a tall lanky man who was going somewhere. Two old ladies chatting, and another slightly smaller man in a grey suit. All waiting for the light to change.

I found myself wondering, where is the girl going. She didn't look like she was in a hurry. Then I caught her eye and we both looked away strangely embarrassed, as though we had done some thing wrong. I found myself beginning to wonder where she was going, perhaps the café across the street. The tall man I thought was going to the café also, perhaps to get some thing to eat. The two old ladies were busy chatting and not paying attention to anything about anything at all. Now the shorter man in the grey suit seemed lonely somehow. Looking nowhere and at nothing, perhaps he was on an errand. Then again perhaps not.

The lights changed, and I found myself crossing the street. I too was going to the café, watching

myself as if I was somehow in someone else's body. The tall man and I entered the café at the same time, the young girl also at the same time. The man in the grey suit and the two old ladies had other places to go and disappeared down the long street. Two gentlemen were already seated at a small table near the back of the café, busy playing a game of chess and drinking coffee. I could see the game was in progress and the moves were thus far. 1.e4 e5 2.d4 f6!? I give this move a !? only because it was once played against grandmaster Bobby Fischer in a simultaneous exhibition, which he lost. I have yet to find it, although I remember that it was a master who played it. 3.dxe5 fxe5? Now that was definitely not the right move. 4.Qh5+ Ke7. The alternate move here is 4...g6. Although this gives up the rook in the corner after the queen takes on e5. 5.Qxe5+ Kf7 6.Bc4+ Kg6?? {This move is wrong. Here Black should play 6...d5! Only because of 7.Bxd5 and the king is free to go to 7...Kg6. This however is bad because of 8.Qg3! and the king cannot play 8...Kf6 because of Bg5+ and the king must lose his queen to the fork. So all that's left is 8...Kh5 and then 9.h3 Qf6 10.e5 Qg6 11.Bf3 Bg4 12.hxg4#} The game is over. The only move for the black king is to resign when the white queen goes to 7.Qf5, although the player with the black pieces looked as though he was looking for a way out.

Very soon, they began putting the pieces back in place, and it looked as they were going to start another game. I had gotten my coffee and sat down across from the players to watch. What if they had played the normal [1.e4 e5 2.d4] 2...exd4? Then there might have been the following moves. 3.Nf3 Nc6 4.Bc4 Nf6! 5.0-0! Nxe4!? 6.Re1! d5 7.Bxd5! Qxd5 8.Nc3!

8...Qd6 9.Nxe4 Qg6? 10.Nf6+!! Kd8 11.Re8#

The man behind the bar was also watching the games. The young girl in the red dress was busy drinking her coffee and swallowing a bit of her pastry. The tall man was just finishing his drink and was getting ready to leave. The player of the white pieces looked over at me, just for a moment and in that moment, we changed, and I was the player of the white pieces. Then I looked at the barkeep and once again I was someone else. For a moment I was the girl in the red dress, paying no heed to what was going on. Then I was the player of the black pieces, wondering what I could do to change to outcome.

What if, and I went over the moves in my head and the play had gone 1.e4 e5 2.d4! exd4 3.Nf3 Nc6 4.Bc4 Bb4+ 5.c3 dxc3 6.bxc3

6...Be7? 7.Qd5! Nh6 8.Bxh6 0-0 9.Be3 d6 10.h4 Be6  
 11.Qd3 Bxc4 12.Qxc4 Ne5 13.Qe2 Nxf3+ 14.Qxf3 Qd7

 32.Qc8+ Rf8 33.Qxf8+ Qxf8 34.Nxf8 Kxf8 35.Rd1 and  
 White wins (1-0).

What if the moves were different, say the bishop only  
 moved to 6...Bc5 then possible would be 7.Bxf7+! Kxf7  
 8.Qd5+ Ke8 9.Qxc5 Qe7 10.Qc4 Nf6 11.0-0 Nxe4  
 12.Re1! d5 13.Qxd5 Qf7 14.Rxe4+ Kf8 15.Ba3+ Ne7  
 16.Qd8+ Qe8 17.Rf4+ Bf5 18.Rxf5+ and mate (1-0).

What if the moves were 6...Ba5 7.Qb3 Qe7 8.0-0 Nf6 9.Ba3 d6 10.e5 Nxe5 11.Nxe5 Qxe5  
 12.Bxf7+ Kf8 13.Bb2 Bb6 14.Nd2 Qe2 15.Nc4 Kxf7!? 16.Nxd6+! Ke7 17.Nxc8+ Raxc8 18.Ba3+

 Rxe2 26.Qxe2+ Kd8 27.Qe7+ Kc8 28.Bd6 and White won (1-0).

And yet another theme comes to mind. 1.e4 e5 2.Nf3 d6 3.d4 Bg4 4.dxe5 Bxf3 5.Qxf3 dxe5 6.Bc4  
 Qe7 7.Qb3 c6 8.Nc3 Nf6 9.Bg5 b5

 17.Rd8# The tall man was gone, and I was about to  
 leave. This game was Morphy's, one that I still  
 remember because of the beautiful mate.

Let me see if I can recall a few of my games, mostly 15 minutes and 10 seconds increment.  
 Here is one from a while back.
